FRIGODATA ONLINE
WEB PORTAL FOR PLANT ANALYSIS AND DOCUMENTATION

Features

FRIGODATA ONLINE is a website that uses internet browser technology to allow easy online management of your plants in multiple languages. **FRIGODATA ONLINE** can be used for all projects with Wurm control technology and remote data transmission.

System
- Platform independent
- Location independent
- High security with https
- Authentication by OneID, SMS or e-mail code
- Automatic update service
- Data backup and archiving

Functions
- Temperature documentation according to HACCP with acknowledgement management
- Call up all control modules and monitoring modules
- Parameterisation of all control modules and monitoring modules by direct connection with the plant (LIVE mode)
- Process visualisation with integrated visualisations and locations of measured values
- Numerous search criteria allow easier project administration
- Sorting function by table columns at the click of a mouse
- Data export in Excel® and PDF format
- Server-to-server data exchange

Evaluations/displays across different stores
- Freely configurable summaries (projects)
- Information across multiple projects
- Highly detailed management diagrams:
  - Fault history and statistics
  - Temperature conformity (across all cold locations in all selected projects)
  - Energy comparison (absolute, standardised, trend, coefficient)
  - Plant utilisation and COP overview
  - Rack overviews T_0/T_c

System requirements

- Access to the Internet
- Web browser (Internet Explorer®, Firefox®, Safari®…)
- Access authorisation
