

FRIGODATA MOBILE

SYSTEM SERVICE WITH WEB APPLICATION

Features

Frigodata Mobile is a web application that allows access to any system with Wurm control technology and remote data transmission.

- Independent of location and PC platform
- No need to maintain master data
- Easy, clearly-organised operation
- Language can be switched to English

Extract from the scope of functions:

- All Wurm controllers visible in the controller selection
- Call up and parameterisation of all control and monitoring modules via direct connection to the system (LIVE mode)
- Device explorer
- Setpoint branches
- Current alarms for a project, alternatively alarms for all projects
- HACCP table

System requirements

- Smartphone
- Access to the Internet
- Access authorisation
